

The diagram illustrates a system architecture for a mobile terminal and its network connectivity. The components and their interconnections are as follows:

- Mobile Terminal (10):** A large container box on the left containing several sub-components:
 - PIM 1 (50a):** A box with a **Sync** sub-box. It is connected to a line labeled **45a**.
 - PIM 2 (50b):** A box with a **Sync** sub-box. It is connected to a line labeled **45b**.
 - PIM N (50c):** A box with a **Sync** sub-box. It is connected to a line labeled **45c**.
 - Multiple PIM Functionality (40):** A label pointing to the group of PIM components.
 - Transceiver (35):** A box connected to a line labeled **20**.
 - Display (60):** A box at the bottom of the terminal.
- PLMN (25):** A box labeled **PLMN** (Public Land Mobile Network) connected to the Transceiver (35) via line **20**.
- Internet (30):** A large cloud-like shape representing the Internet, connected to the PLMN (25) and three servers.
- Servers:** Three boxes labeled **Server 1**, **Server 2**, and **Server 3**, each with a **Sync** sub-box.
 - Server 1:** Connected to the Internet (30) via line **15a**. Its Sync sub-box is connected to line **55a**.
 - Server 2:** Connected to the Internet (30) via line **15b**. Its Sync sub-box is connected to line **55b**.
 - Server 3:** Connected to the Internet (30) via line **15c**. Its Sync sub-box is connected to line **55c**.
